Indra Selects Ouster's Digital Lidar for Its Global Electronic Toll Collection Projects

November 10, 2026

Indra's integration of Ouster's already-deployed REV7 lidar sensors drives increased system performance and reliability across electronic tolling solutions, while Indra also explores REV8 capabilities such as 3D native color sensing for next-generation, high-speed vehicle detection

SAN FRANCISCO--(BUSINESS WIRE)--Nov. 10, 2026-- Ouster, Inc. (Nasdaq: OUST), a leader in sensing and perception for Physical AI, and Indra, a global leader in technology and engineering solutions for air traffic control, mobility, defense, and digital transformation, announced Indra's selection of Ouster's 3D digital lidar sensors to enhance detection capabilities across its electronic toll collection projects. Indra has already deployed hundreds of Ouster's Rev7 sensors across the Americas and Europe.

Indra Selects Ouster's Digital Lidar for its Global Electronic Toll Collection Projects

Indra's track record includes over 2,500 mobility projects developed in more than 50 countries, and its toll systems manage over 3,300 lanes worldwide, handling 5 million trips daily. By integrating Ouster's 3D digital lidar into its highway and roadway gantry systems, Indra is directly addressing the surging global demand for smart transportation infrastructure.

"Ouster's advanced lidar technology significantly boosts the performance of our toll solutions," said Javier Rojo, ITS and Tolling Solutions Director at Indra. "During our rigorous testing and our real-world deployments, Ouster's sensors outperformed every other system we evaluated, making them a clear choice for our upcoming global projects. We are excited to continue to expand our relationship with Ouster in the U.S. and other global markets."

Transitioning from legacy 2D lidar to Ouster's Rev7 3D digital lidar sensors delivered a major technological leap for Indra. Specifically, the sensors provide high-precision, 360-degree, long-range detection for expanded lane coverage alongside high-resolution data, allowing Indra's solutions to accurately capture vehicle size and volume. Furthermore, the rugged sensors deliver reliable performance even in adverse weather and lighting conditions and are engineered for long-term deployments. Ouster offers sensors and solutions that are compliant with Build America, Buy America Act requirements for U.S. transportation infrastructure.

As part of the collaboration, Indra is exploring next-generation detection capabilities with Ouster's Rev8 digital lidar, such as 3D native color sensing and advanced detection for high-speed, multi-lane, free-flow applications.

"Ouster is transforming transportation infrastructure across the globe, and tolling represents a massive growth opportunity for our sensor and software solutions," said Cyrille Jacquemet, Chief Revenue Officer at Ouster. "By leveraging Ouster's reliable and high-performance sensors, Indra is well positioned to rapidly scale its solutions around the world, and we are excited to continue to support these efforts."

About Ouster

Ouster (Nasdaq: OUST) is a leader in sensing and perception for Physical AI across industrial, robotics, automotive, and smart infrastructure. With a unified platform of high-performance digital lidar, cameras, AI compute, sensor fusion and perception software, and AI models, Ouster delivers solutions that improve quality of life in the physical world. Headquartered in San Francisco, CA, Ouster has a global presence serving thousands of customers with offices in the Americas, Europe, and Asia-Pacific. For more information about our products, visit www.ouster.com, contact our sales team, or connect with us on X or LinkedIn.

About Indra

Indra, one of the most foremost global technology companies, is a world leader in smart mobility, having completed over 2,500 projects in more than 100 cities and 50 countries on the five continents. Over the last 30 years, Indra has provided tolling systems to more than 20+ countries, with over 3,300 lanes in operation and Back Office Systems for toll motorways in 20 countries. One of Indra's most recent deliveries, I-66 Express Outside the Beltway, an integrated all-overhead tolling, video-occupancy detection, ATMS, and ITS for managed lanes, with C-V2X infrastructure and connected vehicles platform, is considered one-of-a-kind in the United States today. Indra has been awarded with the IBTTA Toll Excellence Award in the Private Sector Innovation in 2024 for this project in Virginia. Indra is part of the Indra Group, a holding company with more than 60,000 employees, local presence in 49 countries and commercial operations in more than 140 countries.

About Indra Group USA

Indra Group USA is the American subsidiary of Indra Group, a global leader in technology and engineering solutions for air traffic control, mobility, defense, and digital transformation. Delivering mission-critical systems that advance the safety, efficiency, and sustainability of transportation and infrastructure across the United States, Indra Group USA is backed by decades of expertise, partnerships and operations in 140 countries. It is helping modernize air traffic control and intelligent transportation and mobility systems to meet the evolving needs of American communities, agencies, and industry partners. Forward-Looking Statements

This press release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. The Company intends such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended. Such statements are based upon current plans, estimates and expectations of management that are subject to various risks and uncertainties that could cause actual results to differ materially from such statements. The inclusion of forward-looking statements should not be regarded as a representation that such plans, estimates and expectations will be achieved. Words such as "offer," "expect," "will", "may," "anticipate," "intend," "reflect," "should," "plan," "can," "could," "estimate," "possible," "potential," "pursue," "demonstrate," and the negative of these terms and similar expressions are intended to identify forward-looking statements, though not all forward-looking statements use these words or expressions. All statements, other than historical facts, including statements regarding the capabilities and applications of Ouster's products, including with respect to the opportunity for customers to modernize transportation and toll collection infrastructure using such products; the anticipated performance, benefits to and expectations around customer adoption and application of Ouster's product offerings; and the Company's future growth and opportunities and its competitive position constitute forward-looking statements. All forward-looking statements are subject to risks and uncertainties that may cause actual results to differ materially from those that we expected, including, but not limited to, product quality and liability risks; supply chain constraints; cancellation or postponement of contracts or unsuccessful implementations; risks related to the use of AI tools by us and others, including risks related to product performance, cybersecurity, and data privacy; the Company's ability to maintain BABA compliance for its product offerings; the Company's ability to manage growth, including the supply of BABA-compliant products; inaccurate forecasts of market growth and customer demand; Ouster's ability to respond to evolving regulations and standards and other important risk factors discussed in the Company's Annual Report on Form 10-K for the year ended December 31, 2025, and as may be further updated from time to time in the Company's Quarterly Reports on Form 10-Q and other filings with the SEC. Readers are urged to consider these factors carefully and in the totality of the circumstances when evaluating these forward-looking statements, and not to place undue reliance on any of them. Any such forward-looking statements represent management's reasonable estimates and beliefs as of the date of this press release. While Ouster may elect to update such forward-looking statements at some point in the future, it disclaims any obligation to do so, other than as may be required by law, even if subsequent events cause its views to change.
